PARÉ

DURA+
Next generation of facade systems!

ABOUT PARÉ

The thought process behind every product launched by PARÉ is to Identify Innovative Surfaces used around the globe, introduce them in the Indian market, establish a manufacturing base and focus on establishing a domestic as well as international base for the company keeping Indian manufacturing in mind.

PARÉ is currently at the forefront by launching Innovative Surfaces for the interior goods industry that have been very well received by the end users. We are very proud to launch PARÉ DURA+ - Exterior facade systems, a ground breaking product that is durable and sustainable but also more aesthetic with its real wood look.

INNOVATION

PARÉ is committed to bringing Innovative surfaces that use world-class cutting edge technology to develop stronger, aesthetic, environment friendly and sustainable building materials. Our team of experts are constantly exploring new ways to improve the performance of building materials, and our research and development efforts are focused on developing breakthrough products and technologies that can revolutionize the building material industry.

In recent years, we have partnered with some of the world's leading architects and engineers to develop ground-breaking new products and technologies.

DURA+

Exterior Facade System

PARE DURA+ Systems is the result of time taking research while knowing the requirements that the end user should experience. Unlike majority of the products available, DURA+ Systems is endowed with unique components that allow to eliminate majority of the downsides that a user may face.
